## SUMMARY

---

Proactive and technically skilled Computer Engineering graduate with hands-on experience in technical support, mobile and web Automation. Adept at troubleshooting, client relations, and streamlining processes to enhance operational efficiency. Strong multitasker with proven ability to manage client communications, and handle technical and administrative tasks in fast-paced environments. Eager to contribute technical expertise to a dynamic team while continuously learning and embracing emerging technologies.

## EXPERIENCE

---

Oct 2025

### Automation Engineer

Buypass Limited

Implemented an automated order processing system using Zapier to streamline order fulfillment and reduce manual errors. Used Python scripts with the requests library to integrate with shipping carriers and generate shipping labels. Set up automated email notifications using Mailchimp to keep customers informed about order status and shipping updates.

Feb 2025

### Automation Engineer & ICT Support

Mutual Trust Microfinance bank

Implemented a chatbot using Dialogflow to handle common customer inquiries and route complex issues to human agents. Used automation scripts with Selenium to automate repetitive tasks, such as updating ticket statuses and follow-up emails. Integrated a knowledge base using Confluence to provide customers with self-service options and reduce support tickets.

Feb 2024 — Mar 2025

### Automation Engineer

Konga (E- Commerce Platform)

Implemented an automated inventory management system using Python scripts with the pandas library to track stock levels. Used automation scripts with BeautifulSoup to scrape competitor prices and adjust Konga's prices accordingly. Set up automated notifications using Slack to alert the inventory team of low stock levels and other issues.

## EDUCATION

---

### **B.Sc in Computer Engineering**

University of Ilorin, Kwara State, Nigeria

Relevant Course Works: Software Engineering, Data Structure and Algorithms I & II, Artificial Intelligence, Compiler Construction, Introduction to C++ Programming Language, Introduction to Java Programming Language, Operating Systems, Database Management System, Computer Architecture.
